(619)-548-8049 | jamesatruntime@gmail.com | U.S. Citizen - San Francisco | [LinkedIn](#) | [GitHub](#)

Software Developer (2y+ Experience) building internal tools and shipping products with users.

## EDUCATION

---

Cal Poly Humboldt | Arcata, CA

May 2026

*B.S. in Computer Science*

## RELEVANT EXPERIENCE

---

Plasmatech USA | Part Time Remote/Hybrid

Aug. 2024 - Apr. 2026

*Software Developer & Web Administrator*

Plasmatech USA is a small manufacturing company machining raw teflon into complex valves and fittings.

- Built an internal shipping integration tool that pulls invoices from QuickBooks and auto generates carrier ready shipping labels, eliminating and replacing the recurring manual bottleneck and reducing fulfillment errors.
- Modernized the company's WordPress storefront, redesigning the UI and adding custom intake forms to streamline the quote workflow, generating a new source of leads which now represents 27% of total inquiries, roughly \$200k leap.

## PERSONAL PROJECTS

---

SoundCloud MP3 Downloader | [downloadsoundcloudlikes.com](https://downloadsoundcloudlikes.com) | Node.js, Express, JSZIP

Apr. 2026

- Built and deployed the only web app that lets users bulk download their SoundCloud likes and playlists as MP3s, serving 50K+ downloads per month.
- Engineered a client side download architecture that streams audio from Cloudflare directly to the user's browser, offloading bandwidth to the client for near instant downloads at zero server egress cost.
- Hosted the Node.js backend cheaply on Render, handling track resolution and metadata processing while keeping heavy file transfer off the server.

Rust (Video Game) Loot Data Platform | C#, Unity, SQL, .NET Framework, ASP.NET, React.js

Mar. 2026

- Identified inaccuracies in public wiki data for the game Rust's loot tables and reverse engineered game server code to extract statistically accurate drop rates.
- Developed custom plugins/mods in C# to collect and export accurate loot data from the game server at runtime.
- Built an ASP.NET application connected to a PostgreSQL database to store and serve loot data through RESTful APIs.
- Deployed a public React-based web interface to display accurate loot tables for all in game containers and items.

## LEADERSHIP & INVOLVEMENT

---

Game Development Club @ Cal Poly Humboldt

Jan. 2025 - May 2026

*Founder & President*

- Founded and grew the university's official game development organization to over 50+ members.
- Organized and hosted Game Jams, managing event logistics, team coordination, and guiding new members through game development.

## TECHNICAL SKILLS

---

**Languages:** C#, SQL, JavaScript (ES6+), HTML5, CSS

**Frameworks/Libraries:** .NET Framework, .NET Core, React.js

**Tools/Platforms:** Docker, Git, PostgreSQL, dnSpy, IDA Pro

**Concepts:** REST APIs, MVC, DI, Agile/Scrum
