Software Developer (2y+ Experience) Specializing In Seamless Backend Workflows

RELEVANT EXPERIENCE

Plasmatech USA | Remote/Hybrid

Aug. 2024 - Apr. 2026

Software Developer & Web Administrator

- Built an internal shipping integration that pulls invoices from QuickBooks and auto-generates carrier-ready shipping labels, eliminating a recurring manual bottleneck and reducing fulfillment errors.
- Modernized the company's WordPress storefront, redesigning the UI and adding custom intake forms to streamline the quote workflow, increasing inbound leads by 43%.

PERSONAL PROJECTS

SoundCloud MP3 Downloader | downloadsoundcloudlikes.com | Node.js, Express, JSZIP

Apr. 2026

- Built and deployed the only web app that lets users bulk download their SoundCloud likes and playlists as MP3s, serving 50K+ downloads per month.
- Engineered a client side download architecture that streams audio from Cloudflare directly to the user's browser, offloading bandwidth to the client for near instant downloads at zero server egress cost.
- Hosted the Node.js backend on Render, handling track resolution and metadata processing while keeping heavy file transfer off the server.

Rust (Video Game) Loot Data Platform (In Progress) | C#, Unity, SQL, .NET Framework, ASP.NET, React.js

Mar. 2026

- Identified inaccuracies in publicly available Rust game loot tables and reverse engineered game server code to extract statistically accurate drop rates.
- Developed custom plugins/mods in C# to collect and export accurate loot data from the game server at runtime
- Built an ASP.NET application connected to a PostgreSQL database to store and serve loot data through RESTful APIs.
- Deployed a public React-based web interface to display accurate loot tables for all in game containers and items
- Containerized the ASP.NET application and PostgreSQL database using Docker, streamlining the deployment process.

EDUCATION

Cal Poly Humboldt | Arcata, CA

May 2026

B.S. in Computer Science, Major GPA: 3.29/4.0

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript (ES6+), HTML5, CSS

Frameworks/Libraries: .NET Framework, .NET Core

Tools/Platforms: Docker, Git, PostgreSQL, dnSpy, IDA Pro

Concepts: REST APIs, MVC, DI, Agile/Scrum
